SPECIALTY :

Audiology

This document comprises a discipline-specific version of the general competence document and provides additional guidance as to how to complete the general document, Appendix 1 of the Guidelines, that you must submit with your application.

Remember that the aim of the process is for the candidate to satisfy the assessor that he or she has the appropriate basic qualifications and length of experience for issue of the Certificate of Attainment, and that the training programme/period of supervised practice has enabled the candidate to achieve the basic level of competence required for registration as a clinical scientist.

SPECIALTY :

EXPERIEN	CE: The candidate should be able to demonstrate that he/she has w experience relevant to the competences set out below.	vorked in an environment that has enabled the individual to receive training and gain		
GENERIC COMPETENCES SPECIFIC COMPETENCES				
	1-SCIENTIFIC	Be able to demonstrate the rigorous application of scientific methods in his/her experience to date		
Sci1	 understanding the science that underpins the specialty (modality) and the broader aspects of medicine and clinical practice understand the principles of diagnostic assessment and rehabilitate employed within Audiology must be able to choose, perform and advise on test selection for instinate 			
Sci2	 demonstrating a strong base of knowledge appropriate to the specialty and to the investigations and therapeutic options available must understand the principles of diagnostic assessment a outcomes must be able to choose and carry out an appropriate test 			
Sci3	experience of searching for knowledge, critical appraisal of information and integration into the knowledge base must be familiar with the principles of evidence-based investigation and management (EBM) as applied to diagnosis, clinical monitoring and treatment			
Sci4	 ability to apply knowledge to problems associated with the routine provision, and development, of the service must be familiar with scientific developments in clinical audiology and i relevant disciplines 			
Sci5	 ability to identify the clinical decision which the test/intervention will inform 	 must be able to demonstrate breadth of knowledge in order to develop an appropriate approach to clinical assessment must be familiar with the evidence for, and limitations of, the common procedures used in the diagnosis and management of patients with hearing and balance disorders 		
Sci6	ability to make judgements on the effectiveness of procedures			
Sci7	 application of the knowledge base to the specialty (modality) and to the range of procedures/investigations available must have a knowledge of the anatomy and physiology of the audito vestibular systems including associated dysfunction and disorders must have a working knowledge of related disciplines 			
 An understanding of biological and physical sciences underpinning audiological practice A critical understanding of the use of diagnostic tests and rehabilitative techniques and interpretation of results An understanding of how audiology integrates with other diagnostic techniques and rehabilitative methods A critical understanding of scientific methods and evaluation techniques to develop tests to be used routinely in audiological science Develop research skills and expertise sufficient to support supervised and collaborative research initiatives in audiological science 				
Achieved throug	 A structured taught element (e.g. accredited MSc course) and Completion of BAA Certificate of Audiological Compete presentation of protocol development and research of a structure or construction of protocol development and research of a structure of	ence training scheme plus participation in local research and development and		

SPECIALTY :

	rehabilitation, plus BAA Certificate in research skills or participation in local research and development and presentation of protocol development and research of a standard suitable for publication.
Assessed by:	 BAA CAC or HTS supervisors and examiners Registered clinical scientist acting as overall supervisor Local line manager

SPECIALTY :

FXPFRIFN			worked in an environment that has enabled the individual to receive training and gain
	experience relevant to the competences set out below.		
GENERIC COMPETENCES SPECIFIC COMPETENCES			
		2-CLINICAL	Be able to demonstrate the following relevant to the contribution of
		2-CLINICAL	his/her specialty to patient care:
Clin1	 to understand the requirements of accuracy and precision of a procedure in the context of diagnosis, prognosis, monitoring and treatment and to use that information appropriately 		 must have experience-based understanding of all aspects of the diagnostic process, comprising history-taking, the clinical examination, the formulation of differential diagnosis, the role of other service and professionals, and the
Clin2	(therap	y to provide interpretation of data and a diagnostic peutic) opinion, including any further action to be taken by the ual directly responsible for the care of the patient	 consequent integration of knowledge relevant to the individual patient must have experience-based understanding of all aspects of the diagnostic process, comprising history-taking, the clinical examination, the formulation of
Clin3	Clin3 • understanding of the wider clinical situation relevant to the patients presenting to his/her specialty		differential diagnosis and individual management plans, understand the role of other clinical service and professional, and the consequent integration of knowledge relevant to the individual patient
Clin4	 ability to develop/devise an investigation strategy taking into account the complete clinical picture 		 must be able to interpret clinical results and make management decisions for individual patients and evaluate these in light of other clinical information must be able to ensure own personal views and beliefs do not influence clinical advise must be able to demonstrate holistic approach to patient management must be able to assess the needs of patients and customising care as appropriate must have, from an evidence base, a sufficiently detailed understanding of internal quality control, of standards of practice
Clin5	• understanding of the clinical applications of his/her specialty and the consequences of decisions made upon his/her actions/advice		
Clin6	awareness of the evidence base that underpins the use of the procedures employed by the service		
		• A critical understanding of the test techniques, their limit	
Achievement of.	•	• A critical understanding of result interpretation and how to make management decisions	
 A structured taught element (e.g. accredited MSc course) and Completion of BAA Certificate of Audiological Competence training scheme and further post CAC supervised clinical experi- Or Completion of BAA HCCC in Adult Rehabilitation & ENT Support, HCCC in paediatric assessment, plus HCCC in balance a rehabilitation 		tence training scheme and further post CAC supervised clinical experience	
Assessed by:	BAA CAC or HTS supervisors and examiners		

SPECIALTY :

Audiology

EXPERIENCE: The candidate should be able to demonstrate that he/she has worked in an environment that has enabled the individual to receive training and gain experience relevant to the competences set out below.		
	GENERIC COMPETENCES	SPECIFIC COMPETENCES
	3-TECHNICAL	Be able to demonstrate the following, relevant to the modality or area of specialisation in which he/she wishes to be recognised
Tech1	 understanding of the principles associated with a range of techniques employed in the modality including the appropriate use of Information Technology must be able to perform and record audiological techniques bei contraindications 	
Tech2	• knowledge of the standards of practice expected from these techniques including positioning of patients for safe interventions	must understand the principles of diagnostic assessment and rehabilitative techniques employed in audiology
Tech3	experience of performing these techniques	must have a high level of practical competence in any special techniques relevant to an intended or actual area of specialisation
Tech4	• the ability to solve problems that might arise during the routine application of these techniques (troubleshooting)	must be able to demonstrate the an ability to utilise patient management systems and integrated clinical software
Tech5	understanding of the principles of quality control and quality assurance	 must be familiar with the evidence for, and limitations of, the common procedures used in the diagnosis and management of patients with hearing and balance disorders must be aware of recommended procedures and guidelines
Tech6	• experience of the use of quality control and quality assurance techniques including restorative action when performance deteriorates	
	·	
Achievement of	• A critical understanding of test parameters and how	these affect results
Achieved throug	 A structured taught element (e.g. accredited MSc course) and Completion of BAA Certificate of Audiological Competence training scheme, further post CAC supervised clinical experience and service development experience BAA Completion of BAA HCCC in Adult Rehabilitation & ENT Support, HCCC in paediatric assessment, HCCC in balance assessment & rehabilitation, plus BAA Certificate in service development or further service development experience. 	
Assessed by:	BAA CAC or HTS supervisors and examiners

SPECIALTY :

EXPERIEN	PERIENCE: The candidate should be able to demonstrate that he/she has worked in an environment that has enabled the individual to receive train experience relevant to the competences set out below.		orked in an environment that has enabled the individual to receive training and gain
	GENERIC COMPETENCES		SPECIFIC COMPETENCES
	4-R	ESEARCH AND DEVELOPMENT	Be able to demonstrate a training in research which should include:
R&D1	• ability	y to read and critically appraise the literature	 must have developed sufficient verbal and written communication skills, data handling ability, and peer-group relationships to present with confidence results of
R&D2	• ability	y to develop the aims and objectives associated with a project	research for critical appraisal by colleagues and reviewers • must have acquired the ability to critically appraise published research or clinical
R&D3	ability to develop an experimental protocol to meet the aims and objectives in a way that provides reliable and robust data (i.e. free of bias)		problem in audiology and to assess the importance and feasibility of investigating it further • must be able to identify a meaningful hypothesis or answerable question about
R&D4	ability to perform the required experimental work ability to produce and present the results (including statistical analysis)		 Indict be able to identify a meaningful hypothesis of answerable question about the topic or problem, to formulate indications for research aims and objectives by which a plan of investigation may be designed, monitored and appraised must be able to evaluate whether research/R&D proposals are likely to advance existing knowledge and/or practice must understand the skills needed to effect audiological research and NHS-
R&D5	recognise the value of research and has the ability to critically appraise results in the light of existing knowledge and the hypothesis developed and to formulate further research questions		
R&D6		y to present data and provide a critical appraisal to an ce of peers – both spoken and written	 Indet the skins ficeded to crited additiogleal research and NTS related research and development on an audiological topics or problem must be able to critically appraise research reports and publications
 An ability to critically appraise research reports and publ An ability to formulate research questions and experiment An ability to carry out statistical analysis 		• An ability to formulate research questions and experiment	
and		 and further significant research activity to include contribution or 	to include a research dissertation
 BAA HTS supervisors and examiners (if appropriate) Registered clinical scientist acting as overall supervisor 			

SPECIALTY :

EXPERIEN	EXPERIENCE: The candidate should be able to demonstrate that he/she has worked in an environment that has enabled the individual to receive training and gain experience relevant to the competences set out below.		
GENERIC COMPETENCES		L ▲	SPECIFIC COMPETENCES
		5-COMMUNICATION	Be able to communicate in both the written and spoken media to colleagues, peers and patients:
Com1	ability to assess a situation and act accordingly when representing the specialty		 must be able to communicate personally to colleagues within the discipline, and in other branches of the NHS and allied professions, with clarity of thought, expression, and purpose
Com2	• ability to respond to enquiries regarding the service provided when dealing with clinical colleagues		• must be capable of communicate effectively and sensitively, avoiding jargon, with a range of people of different national, social or cultural heritage in English at level 7 of IELTS but adapt language to patient communication needs
Com3	ability to communicate with patients, carers and relatives, the public and other healthcare professionals as appropriate		 must be able to listen carefully, to check understanding, and to negotiate in difficult issues without triviality or hostility must understand the importance of effective communication with colleagues and be able to function as an effective member of a multidisciplinary team understand the importance of providing information to service users in an accessible format in order to facilitate them making informed decisions. This may take the form of a DVD for BSL users
Com4	ability to communicate the outcome of problem solving and research and development activities		
Com5	evidence of presentation of scientific material at meetings and in the literature		 must be able to present scientific, technical, clinical and managerial information effectively, using a range of appropriate media, so as to maximise understanding whilst maintaining economy and essence of time
 Achievement of: Development of appropriate oral communication skills with colleagues, patients, relatives and other healthcare professionals Development of written communication skills in the form of patient reports, service reports and scientific material 		• •	
Achieved through:		 A structured taught element (e.g. accredited MSc course) and Completion of BAA Certificate of Audiological Competence training scheme, further post CAC supervised clinical experience, further significant research activity to include contribution to a peer reviewed journal article or conference presentation and service development experience Or Completion of BAA HCCC in Adult Rehabilitation & ENT Support, HCCC in paediatric assessment, HCCC in balance assessment & rehabilitation, plus BAA Certificate in research skills and BAA Certificate in service development or further post HCCC supervised clinical 	

SPECIALTY :

	experience, further significant research activity to include contribution to a peer reviewed journal article or conference presentation and service development experience.
Assessed by:	 BAA CAC or HTS supervisors and examiners Registered clinical scientist acting as overall supervisor
	Local line manager

SPECIALTY :

EXPERIEN	ENCE: The candidate should be able to demonstrate that he/she has worked in an environment that has enabled the individual to receive training and gain experience relevant to the competences set out below.		
GENERIC COMPETENCES SPECIFIC COMPETENCES			SPECIFIC COMPETENCES
		6-PROBLEM SOLVING	Be able to deal with the unexpected and thus be able:
PS1	• to as	ssess a situation	must be able to utilise knowledge in order to resolve problems
PS2		rmine the nature and severity of the problem	• must be able to initiate and follow through the timely resolution problems with
PS3	 call u proble 	upon the required knowledge and experience to deal with the m	 confident action, direction and effective communication must have sufficient knowledge of the scientific, operational and material basis
PS4	initiate resolution of the problem		of these techniques to be able to recognise, solve and minimise problems connected with analytical performance
PS5	• dem	onstrate personal initiative	
Achievement o	f:	 An understanding of fault finding techniques Development of skills to enable management of a situatio An understanding of the implications of the problem 	n if a problem arises
Achieved through:		 A structured taught element (e.g. accredited MSc course) and Completion of BAA Certificate of Audiological Competence training scheme and further post CAC supervised clinical experience, service development and research Or Completion of BAA HCCC in Adult Rehabilitation & ENT Support, HCCC in paediatric assessment, HCCC in balance assessment & rehabilitation, plus BAA Certificate in research skills and BAA Certificate in service development or further post MSc supervised clinical experience, service development and research. 	
 BAA CAC or HTS supervisors and examiners Registered clinical scientist acting as overall supervisor Local line manager 		• Registered clinical scientist acting as overall supervisor	

SPECIALTY :

EXPERIENCE: The candidate should be able to demonstrate that he/she has worked in an environment that has enabled the individual to receive training and gain experience relevant to the competences set out below.			
	GENERIC COMPETENCES	SPECIFIC COMPETENCES	
	7-PROFESSIONAL ACCOUNTABILITY	Be able to demonstrate an understanding of management principles and techniques, including the following:	
Prof1	Has read, understands and follows the Standards of Proficiency for Clinical Scientists and published by the Health Professions Council	must understand the principles of clinical governance and be	
Prof2	To be personally responsible for and must be able to justify their decisions	able to audit, reflect on and review practice	
Prof3	Understanding of the legal and ethical requirements of the modality, and the eth aspects of scientific research.	 must understand the principles of clinical governance and be 	
Prof4	• Understands the need to practice safely and effectively within their abilities and recognise the limits of personal practice and identify when to seek advice.	 able to audit, reflect on and review practice must understand the need for and basic requirements of accreditation schemes appropriate to the modality of audiology 	
Prof5	Ability to manage personal workload and prioritize tasks appropriately.	ensure compliance with CPD requirements and maintain records	
Prof6	• Can demonstrate competence in the principles of clinical governance including clinical audit, accreditation requirements relevant to the modality. This will include importance of equality and diversity, confidentiality, informed consent and data security	boundaries	
Prof7	 Ability to contribute effectively to work undertaken as part of a multi-disciplinary team 	 must have acquired a basic understanding of the structure and organization of the department, and relevant financial aspects. must be able to recognise the limits of his/her knowledge and 	
Prof8	• Ability to supervise others as appropriate to area of practice. Understanding of role of appraisal in staff management and development.	 skills must participate in an appropriate CPD scheme (after completion of training) 	
Prof9	Understanding of the need and obligation for career-long self-directed learning a the importance of continuing professional development.	must have acquired a basic knowledge of health and safety requirements appropriate to the discipline	
Prof10	Understanding of the need for, and ability to establish and maintain, a safe prace environment. Understanding of the requirements and obligations of Health and Sa including infection control		

SPECIALTY :

Audiology

Prof11 in st	Understanding of the structure and organization of the department and how it fits to the local clinical setting, General understanding of the way the modality is ructured and practised in other locations within the UK. Basic understanding of the apportance of financial accountability, budgetary control and resource management.	
Achievement of:	 an understanding of the management principles and tools used in the service the ability to act as a professional and work effectively as part of a team understanding of the importance and principles of accreditation, audit, confidentiality, data security and safe working practice 	
 understanding of the importance and principles of accreditation, audit, confidentiality, data security and safe working practice A structured taught element (e.g. approved MSc course) and Completion of BAA Certificate of Audiological Competence training scheme and participation in appropriate training programmes and courses on general, personnel and financial management, health and safety, audit, etc. participation in local seminars and meetings, atter at clinical audit meetings and clinical governance committees. Attendance at departmental management meetings, involvement, under supervision, in management within the department, mentoring by an experienced practitioner Or Completion of BAA HCCC in Adult Rehabilitation & ENT Support, HCCC in paediatric assessment, HCCC in balance assessment & rehabilitation, plus BAA certificate in service development or participation in local seminars and meetings, attendance at clinical governance committees. Attendance at departments and meetings, attendance at clinical audit meetings and clinical governance committees. Attendance at department reasons and local courses on general personnel and financial management, health and safety, audit, etc. participation in local seminars and meetings, attendance at clinical audit meetings and clinical governance committees. Attendance at departmental management meetings, involvement, under supervision, in management within the department, mentoring by an experienced practitioner. 		
Assessed by:	 BAA Certificate in Service Development supervisors and examiners (if appropriate) Registered clinical scientist acting as overall supervisor Local line manager
